General information

All our IMO signs can be produced on our customers' special demand on an acrylic glass base, ensuring that our signs have a luxurious appearance.

The base material is a 6 mm thick transparent acrylic plate with a greenish tint, which imitates the appearance of real glass.

Afterglow performance

Brightness (in mcd / m2) after			Decay time to 0,3 mcd / m2
10 min	30 min	60 min	
¹⁾ 210 mcd	74 mcd	40 mcd	2240 min
²⁾ 189 mcd	66 mcd	35 mcd	1950 min

1) Maximum capacity - fully charged

2) Tested in accordance with DIN 67510 - charged at 1000 lux for 5 mins

Easy installation

Advantages

- attractive and luxury appearance, imitating real glass
- high transparency and afterglow performance
- UV rays resistance, does not turn yellow
- safe to use
- environmentally friendly

General information

DURA-PLATE is a multilayer material specially designed for the signage industry. The multilayer structure ensures excellent durability even in difficult environmental conditions.

The plate is equipped with a strong adhesive foam which holds the sign on its place even in outdoor moisture conditions and wide range of temperatures. This makes the **DURA-PLATE** an ideal solution for the marine signage.

Material specification:

- high afterglow performance
- non-toxic and free of radioactive additions
- difficult to ignite
- suitable for external use
- protected against mechanical damages
- special maintenance not required

Afterglow performance - acc. to DIN 67510

Brightness in mcd / m ² after						Decay time
2,5 min	5 min	10 min	30 min	60 min	120 min	
365	193	97	31	16	10	1967 min

Tested in accordance with DIN 67510 - charged at 1000 lux for 5 mins

Decay time - period of the light decay to 0,3 mcd / m²

Regulations and Approvals

Products meet the following regulations (all tests performed in accredited laboratories):

- ISO 15370:2001(E)(A.4.3) - Photopic Luminance
- DIN 67510-1 - Photopic Luminance
- IMO FTP Code - Resolution MSC.61(67) Part 2 - Smoke and Toxicity Test
- ISO 1716:2002 - Calorific potential

A-SPE Marking Tapes

ANTI SLIP / NON SLIP TAPES

General description

HS and SS series tapes are an excellent and economical solution of improving the safety standards in slip danger areas. They are available in 2 basic dimensions (5 cm and 10 cm wide). Installation is very simple, see the instructions below.

All tapes are available in the following standard sizes:

Yellow / Green photoluminescent anti-slip tape

Ordering code: HS-PS50 - 50mm x 18m roll
 HS-PS100 - 100mm x 18m roll
 Surface type: **HARD**

Black anti-slip tape

Ordering code: HS-B50 - 50mm x 18m roll
 HS-B100 - 100mm x 18m roll
 Surface type: **HARD**

Transparent anti-slip tape

Ordering code: HS-T50 - 50mm x 18m roll
 HS-T100 - 100mm x 18m roll
 Surface type: **HARD**

Yellow / black diagonal anti-slip tape

Ordering code: HS-YB50 - 50mm x 18m roll
 HS-YB100 - 100mm x 18m roll
 Surface type: **HARD**

Installation

- Make sure that the surface is clean and dry, free of oils, sand or dust.
- Release small piece of the release foil/paper.
- Apply the first part of the tape to the surface and continue removing the release foil gradually.
- The full adhesive strength is achieved 48 hours after installation, try to avoid heavy use of the tape during this time.
- Considering many types of surfaces where the anti slip tapes can be applied – the final user shall perform his own tests, to ensure that the product is suitable for his application and that it meets his demands.

Availability

HARD surface tapes (HS) – possess excellent anti-slip properties however because of the rough surface they are difficult in cleaning and cannot be washed with mops.

SOFT surface tapes (SS) – are mop-friendly solution, they offer much lower anti-slippery properties, however they are much easier in maintenance and cleaning.

White anti-slip tape

Ordering code: SS-W50 - 50mm x 18m roll
 SS-W100 - 100mm x 18m roll
 Surface type: **SOFT**

Black anti-slip tape

Ordering code: SS-B50 - 50mm x 18m roll
 SS-B100 - 100mm x 18m roll
 Surface type: **SOFT**

Transparent anti-slip tape

Ordering code: SS-T50 - 50mm x 18m roll
 SS-T100 - 100mm x 18m roll
 Surface type: **SOFT**

A-SPE Marking Tapes

PHOTOLUMINESCENT TAPES

General description

A-SPE photoluminescent tape is a self-adhesive flexible material with high intensity luminous properties. The product far exceeds requirements of DIN 67510 Part 1.

After its exposure to natural or artificial lighting the material is highly visible to the human eye in the dark. The gradual diminution of glow intensity takes several hours. The material can undergo the process of being recharged with light repeatedly.

The material is non-toxic and non-radioactive, it is phosphorus and lead free. It is not harmful to health or the environment.

Environmental properties

Service temperature	-30°C to +70°C
Applicaion temperature	-20°C to +50°C
Fungus resistance	Resistant to fungi
Solvent resistance	Resistant to gasoline, grease, mild alkaline and acids
Flammability	Self-extinguishing
Shrinkage	Same as for normal self-adhesive vinyl products
Product life	Indoor - in excess of 5 years Outdoor - weather resistant
Shelf life	Under normal conditions for self-adhesive vinyl, approx 1-2 years

Brightness

Brightness (in mcd / m ²) after			Decay time to 0,3 mcd / m ²
10 min	30 min	60 min	
105 mcd	31 mcd	14 mcd	1800 min

Tested in accordance with DIN 67510 - charged at 1000 lux for 10 minutes.

Physical properties

Thickness	0,38 mm (without silicon paper)
Thickness	0,49 mm (with silicon paper)
Weight	0,7 kg / m ²
Width	40 or 80 mm (other on special demand)
Length	10 m (other on special demand)

Availability

Green diagonal tape - for indicating safe areas

Ordering code: PT-4G - 40mm x 10m roll
PT-8G - 80mm x 10m roll

Red diagonal tape - for marking fire hazard areas

Ordering code: PT-4R - 40mm x 10m roll
PT-8R - 80mm x 10m roll

Black diagonal tape - for marking hazard areas and obstacles

Ordering code: PT-4B - 40mm x 10m roll
PT-8B - 80mm x 10m roll

Arrow safety tape - for marking escape routes

Ordering code: PT-4A - 40mm x 10m roll
PT-8A - 80mm x 10m roll

Arrow safety tape - for marking escape routes

Ordering code: PT-4WR - 40mm x 10m roll
PT-8WR - 80mm x 10m roll

Arrow safety tape - for marking escape routes

Ordering code: PT-4WL - 40mm x 10m roll
PT-8WL - 80mm x 10m roll

Plain safety tape - for general identification use (e.g. marking of escape routes)

Ordering code: PT-4P - 40mm x 10m roll
(tape only) PT-8P - 80mm x 10m roll

You can order plain safety tape with the additional transparent stickers (evacuation exit left and right)

Ordering code: PT-4PS - 40mm x 10m roll
(tape + stickers) PT-8PS - 80mm x 10m roll

A-SPE Marking Tapes

IMO PIPE IDENTIFICATION TAPES - ACC TO ISO 14726

General description

Pipeline identification on board ships is very important for safety reasons, especially for the safety of the entire crew. The medium flowing through the pipework can cause a lot of damage, and be dangerous to the people on board the ship during an emergency or in case of pipework damage. The appropriate marking makes it possible to identify the type of danger we are dealing with during the emergency and to take the steps to get rid of it.

The International ISO14726-1 (year 1999) standard defines the basic colors which should be used for pipeline identification on board ships.

Another regulation, ISO 1476-2 (year 2002) specifies additional colors which can be used together with the main colors for a more thorough marking of the medium flowing through the pipework.

The table included in this brochure presents the basic colors and also all the available permutations of identification colors in accordance with the ISO14726-2 (year 2002) norms.

Installation

- Each pipe should be marked at least once in each separate room.
- The best places for installing the identification tapes are: close to the objects like valves, filters or tanks, pipelines passing through walls or ceilings, close to room entrances.
- All surfaces must be thoroughly cleaned before applying the identification tapes.
- During application the tape should overlap 3-4 cm

Technical data

Thickness (average)	80 microns (without protective paper and adhesive)
Dimensional stability	(FINAT TM 14) adhered to steel, no measurable shrinkage in cross directions, in length 0,44 m max
Temperature resistance	adhered to aluminum -40°C to 80°C, no variation
Water resistance	adhered to aluminum, after 48h / 23°C, no variation
Adhesive strength	16 N / 25 mm (FINAT TM 1, after 24h, stainless steel)
Tensile strength	(DIN EN ISO 527) along - min. 19 Mpa across - min. 19 Mpa
Elongation at break	(DIN EN ISO 527) along - min. 130% across - min. 150%
Shelf life	2 years (in original packaging, at 20°C and 50% relative humidity)
Application temperature	min. +10°C
Service life according to specialist application	3 years (depending on individual use conditions)

Availability

The identification tapes are available in two systems:

Multi-color system - tapes with the color combination printed on it - this system is the easiest to install.

Single-colour system - tapes from which you can make any number of color combinations by yourself, this is a more economical and flexible solution, however, the installation takes longer to complete.

Color tapes with arrows

The regular flow direction tapes can be supplied on the background of any color. In this case the colour of the tape identifies the type of agent flowing through the pipework, while the arrow identifies the direction of its flow.

Colour tapes with arrows and texts

Tapes with text include, not only, the description of the type of medium (colour) and the direction of its flow (arrow), but also a detailed description which identifies the agent.

Hazard sign tapes

Hazard sign tapes are used as an additional way of marking pipeworks through which a hazardous agent flows. Different symbols can be used depending on the hazard level. Hazard sign tapes are used most often in connection with arrow or text tapes, but they can be used as separate marking.

A-SPE Marking Tapes

IMO PIPE IDENTIFICATION TAPES - ACC TO ISO 14726

Multi-colour permutations (acc to ISO14726-2):

Description	Colour identification	Ordering code	
		Multi-color	Single-color

Basic identification tapes (acc to ISO14726-1) :

Type	Description	Ordering code
	Waste media	SC40
	Fresh water	SC41
	Fuel	SC42
	Sea Water	SC43
	Non-flammable Gases	SC44
	Masses	SC45
	Oil other than fuel	SC46
	Steam	SC47
	Fire fighting	SC48
	Acids & Alkalis	SC49
	Air in ventilation systems	SC50
	Flammable gases	SC51
	Flow arrows	SC30

Availability / Dimensions

30 mm x 25 m	70 mm x 25 m	120 mm x 25 m
40 mm x 25 m	80 mm x 25 m	140 mm x 25 m
50 mm x 25 m	90 mm x 25 m	150 mm x 25 m
60 mm x 25 m	100 mm x 25 m	160 mm x 25 m

Considering many size standards available on the market we can manufacture any particular size for you.

Way of ordering:

Example for Multi-colour system: MC44-51 (160mm) / 5 pcs

Example Single-colour system: SC40 (40mm) / 2 pcs + SC48 (40mm) / 1 pc

Example configuraton:

A-SPE Marking Tapes

REFLECTIVE TAPES

General description

The reflective warning tapes improve the safety standards during night-time, blackouts or low visibility conditions. Our tapes are suitable for indoor and outdoor use. The product is weather resistant.

Technical data

Outdoor durability:	4 years
Application temp.:	Min. +10°C (+50°F)
Application surface:	Flat. Clean the surface before installation.
Service temperature:	-35°C to +80°C (-31°F to +176°F)
Optical properties:	Meets or exceeds: L-S 300C and FP-85 Type II
Adhesion strength:	16 N / 25 mm (FINAT TM 1, after 24h, stainless steel)
Shelf life:	2 years (in original packaging, at 20°C / 68°F and 50% relative humidity)

Physical data

Thickness	0,24 mm (without silicon paper)
Thickness	0,41 mm (with silicon paper)
Weight	0,48 kg / m ²
Width	45mm, 50mm, 90mm, 100mm, 150mm
Length	10 m (other on special demand)

Availability

Yellow / Black diagonal reflective tape

Ordering code: RT-45D-YB - 45mm x 10m roll
RT-50D-YB - 50mm x 10m roll
RT-90D-YB - 90mm x 10m roll
RT-100D-YB - 100mm x 10m roll
RT-150D-YB - 150mm x 10m roll

Yellow / Black checkerboard reflective tape

Ordering code: RT-45C-YB - 45mm x 10m roll
RT-50C-YB - 50mm x 10m roll
RT-90C-YB - 90mm x 10m roll

RT-150D-RW - 150mm x 10m roll

Red / White checkerboard reflective tape

Ordering code: RT-45C-RW - 45mm x 10m roll
RT-50C-RW - 50mm x 10m roll
RT-90C-RW - 90mm x 10m roll
RT-100C-RW - 100mm x 10m roll
RT-150C-RW - 150mm x 10m roll

A-SPE Marking Tapes

WARNING TAPES

General description

Diagonal warning tapes are also available on regular self-adhesive vinyl foils.

This is the most economical solution, however, it does not offer photoluminescent nor reflective properties.

Availability

Yellow / Black diagonal warning tape

Ordering code: WT-45D-YB - 45mm x 10m roll
WT-50D-YB - 50mm x 10m roll
WT-90D-YB - 90mm x 10m roll
WT-100D-YB - 100mm x 10m roll
WT-150D-YB - 150mm x 10m roll

Red / White diagonal warning tape

RT-50D-RW - 50mm x 10m roll
RT-90D-RW - 90mm x 10m roll
RT-100D-RW - 100mm x 10m roll
RT-150D-RW - 150mm x 10m roll

Mareflex Marine Tapes | MF-01 ANTISPRAY TAPE

General description

The Mareflex MF-01 anti splash tape was designed with the aim of protecting pipeline installations against leakage in accordance with the latest SOLAS Consolidate Edition 2001, Regulation II-2/4.2.2.5.3 and the previous SOLAS Consolidate Edition 1997, Regulation II-2/15.2.9/.10/.11/.12.

The flammable substance once it comes into contact with a hot surface may be the cause of fire. According to the Solas Regulations the tape has been designed to protect pipe flanges and fittings in oil pipe systems against the uncontrolled oil spraying and leakages. The MF01 tape directs any potential leakage to areas where the hot substance will not be dangerous.

Antispray MF01 is available in rolls and sheets format of various size.

Technical specification

- High-performance fiberglass fabric, additionally impregnated for higher pressure resistance.
- Specially developed for this products fire retardant adhesive material gives additional protection against fire danger.
- Water proof adhesive layer helps when the tape is applied in moisture conditions.
- Additional fiberglass mesh increases the flexibility and makes the installation easier.

Mareflex Marine Tapes | MF-20 AND MF-21 SOLAS REFLECTIVE TAPE

General description

SOLAS Reflective Tapes MF-20 and MF-21 were created to enhance the visibility of life saving equipment such as lifebuoys, life jackets, life rafts. The MF-20 and MF-21 tapes have been manufactured in accordance to IMO (International Maritime Organization) Regulation A.658(16) Annex 2 and MED (Marine Equipment Directive) 96/98/EC. The role of these tapes is to increase detection during night search and rescue missions and in conditions of poor visibility.

MF-20 and MF-21 tapes are designed on the basis of the glass lens reflective technology. The reflective surface is protected with an innovative Apex coating. It assures excellent protection against sea water and various types of contamination while at the same time maintaining its reflective properties on a high level.

Tape structure

1. Apex coating
2. Glass beads and aluminum layer
3. Polymer in which the glass beads are embedded
4. Structural layer
5. Self-adhesive layer
6. Release paper

Mareflex Marine Tapes | MF-30 HATCH COVER TAPE

General description

In accordance to regulations metal hatch covers on carriage ships should be protected against leakage of water into the carriage area. Extreme weather conditions often damage hatch covers making them prone to leakage which may lead to the damage of goods being shipped.

Mareflex MF-30 Hatch Cover Tape is a self-adhesive material which can protect goods against damage caused by water leakage. MF-30 Tape is a very enduring material and guarantees protection in all weather conditions.

Mareflex MF-30 is composed of a bituminous mass which has the appropriate viscosity and is protected by polypropylene foil from one side and a release liner from the other. The tape is available in 20 meter rolls 100 and 150mm wide.

Availability

Product code	Single roll size	Amount of rolls in a box	Box weight	Box size
MF30-100	100mm x 20m	3	15 kg	26mm x 26mm x 31mm
MF30-150	150mm x 20m	2	15 kg	26mm x 26mm x 31mm
